### Bin Structure

Including single and multiple bin structures, our overhead bin structures offer an option for square and round bins. Access platforms, ladders, and stairs, are available for options for inspections, load out ability, and maintenance. These structures can be designed for commercial farm grade loading use, and storage. Other common commercial uses for our bins and structure includes, screening bins, whole grain, and meal products. Custom designed structure and bins are available for any desired application. Automation accessories are also available to be used to tie into any existing commercial or farm automation system.
