### Platforms and Stairs

IAP offers a variety of standard sized service platform as well as custom sized service platform for any clients need. Our platforms are able to be painted to any specific color needed. These platforms are also constructed to OSHA's standards and can have other safety features added. If safety gates are needed they will be available as an option for purchase. These access platforms are able to be constructed for non load bearing and load bearing purposes. Typically our platform walkways are constructed with expanded steel but are available in other varieties of working surface. Pre-engineered platform openings can be designed for any purpose whether its for spouting or for unique applications. Our ladder access packages can come with pre assembled caging or ladder caging packages if required.
